## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment, filed 2/27/2006, overcomes the prior art rejection under 35 U.S.C. 103(a), as set fourth in the Final Office action, dated 11/28/2005, and place the application in allowable condition.

### ***Allowable Subject Matter***

2. Claims 1 – 6 are allowed over the prior art of the record.

3. The following is an examiner's statement of reasons for allowance: the prior art of the record fails to anticipate or rendered obvious the limitation, an electronic endoscope selector comprising: a video signal switching processor that switches video signals, which are output to at least one peripheral device, from first video signals fed from a first electronic endoscope to second video signals fed from a second electronic endoscope; a synchronizing signal switching processor that switches synchronizing signals, which are output to the peripheral device, from synchronizing signals fed from the first electronic endoscope to synchronizing signals fed from the second electronic endoscope, wherein the synchronizing signal switching processor completes synchronization of the synchronizing signals before the video signal switching processor outputs the video signals to the peripheral device; and a switching control processor that drives the video signal switching processor and the synchronizing signal switching processor, and suspends output of the video signals for a predetermined period while the switched synchronizing signals are output, the predetermined period being longer

Art Unit: 2613

than the time required for the synchronizing signal to synchronize with the peripheral device, as claimed.

Claims 2 – 6 are allowed with respect to independent claim 1 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
